

SITE AUDIT

Improving Security and Performance

Heather Wozniak, Assistant Director for Departmental Web Services

PNW DRUPAL SUMMIT SESSIONS

2015.pnwdrupalsummit.org/2015/schedule

- > How to audit Drupal sites for performance, content and best practices – Jon Peck
- > DIY Drupal 7 Performance – Mike Carper
- > Site Security in Drupal 8 [spoke a lot about 7] – Rick Hawkins

SITE AUDIT MODULE

Generates reports with best practice recommendations

- > www.drupal.org/project/site_audit
- > Requires drush (executed via command line)
- > Outputs reports in plain text, HTML, and JSON
- > Integrates with a few other modules

EXAMPLE EXECUTION

```
> drush @music aa --html --bootstrap >  
/my/destination/music.html
```

EXAMPLE REPORT

Site Audit

Generated on Wed, 21 Oct 2015 10:10:17 -0700

Summary

Best practices 92%

Multi-site

The following multi-site configuration(s) were detected: websupport, frenchitalian, classics, germanics, ssc, scandinavian, asian, complit, marcomm, adming, chid, spanport, slavic, music, dance, drama, gwss, lsj, simpson, linguistics, dxarts, aes, ais, econ, polisci, soc, phil

Fast 404 pages

Fast 404 pages are not enabled.

See <https://drupal.org/node/1313592> and default.settings.php for details on how to implement.
